

Questions to ask your Doctor About Biosimilars

You may want to print this sheet and take it with you to your next doctor visit as a reminder of important questions to ask about biosimilars.

- What is a biologic?
- How are biosimilars and biologics related?
- What does it mean to be “biosimilar” in general?
- Should I expect any different outcomes from a biosimilar compared to the original biologic?
- How can I be sure that this biosimilar is as effective as the original biologic?
- How does the FDA approve biosimilars?
- What are the benefits of biosimilars to me (patients), healthcare providers, insurance coverage, and the healthcare system?
- How can biosimilars improve insurance coverage for biologic treatments?
- How can biosimilars become interchangeable, what does this imply?
- Is interchangeability likely to occur in my situation?
